

## **Coordinator report November 20, 2020**

I will be making a personal ethics disclosure, that I was elected and sworn into PV SC and that I am as well the appointed Warwick town coordinator. Further, I elect to be paid as coordinator by the town rather than accept \$200 stipend for SC. It is one or the other.

FRCOG has contacted us about the foreclosed McKnight property next step, in getting a physical environmental assessment. I am seeking a vote to authorize the chair to sign a document to permit site entry and provide liability release of the environmental engineering firm and its contractors.

Tech school was at the McKnight property assisting with cleanup. Two dumpsters one metal and one trash were full. Numerous tires were rolled to the road edge. They hope to return next week. We have about \$8k remaining in the illegal dumping fund and it does not seem to me to provide for "machine time" I got CARES grant refuse removal expense approved but, we don't expend on anything that we were able to fund before the limits COVID-19 makes on TM where there is no provision for "remote".

The big news of the week, perhaps the year is Warwick and Northfield were awarded \$1M each by MassWorks STRAP grant for reconstruction of Northfield Road. Todd attended a Zoom press conference and spoke on our behalf.

I request that the board vote or by consensus name Todd Dexter as Selectboard liaison to the Highway Department.

We have a citizen request for a Selectboard resolution on behalf of the town on the election outcome. This comes from Bill Lyman who is concerned about the future of democracy and peaceful transition. Years ago, when he complained to me about an instance of improper flag display, I authorized him to correct any mistakes he sees. I also involved local Scouts. When four of our residents died in a house fire. Bill decided we needed to invert the flag. He and other conclude that we are again in a state of distress and hung the flag at the veteran's memorial upside down. That symbolic presentation has been reversed and instead, the possibility of the Selectboard speaking on behalf of the Town via a resolution on the subject is substituted.

The Tuesday night local education meeting took up the Capstone statement. Minutes were not clear that the two members of Selectboard were acting in that regard, / behalf and I think it best that all Selectboard members be part of our growing effort and directions. This is all to get to our goal to leave the district and go forward a new way where small and individualized is prized. We have developed a school re-design re-birth timeline as well.

We are working back and forth on enhancements on the WCS demand ventilation project. If we can move the funding for drives /VFDs to enhancing the building control / smart building measure funded for Warwick School by DOER Green Communities

Finally, we are making continued progress on our broadband upgrade. Following is the "roll up" on our activities to make the system reach 25/3 and represents progress in the past two weeks. We can manually institute speed tests in the software which has helped correct anomalies we see between the graphs and a "fastest seen" that is clearly underreporting.
